

● Introducing the Online Brain Injury ●

● Screening & Support System ●

What is the OBISSS? The OBISSS is an online screening system to determine lifetime exposure to brain injury and to identify associated challenges that may be present for youth and adults. This subscription service utilizes the validated and reliable OSU TBI-Identification Method, is self-administered, and setting-driven. This means that someone can complete the OBISSS screen on their own, or with the help of a provider across any setting. The System collects additional demographic information from each individual, and once screened, identifies impairment on a number of challenges using the Symptoms Questionnaire for Brain Injury (SQBI). Tip sheets are delivered, responding to identified challenges, to the individual and the provider. The OBISSS will also provide customized referral information about the subscriber and where to access additional resources and supports. It can be used for:

Client Support:

- Identify TBI and non-TBI history to determine program eligibility
- Identify impairment and share strategies regarding the associated symptoms
- Provide strategies for professionals for how to support their client with a brain injury

Data:

- Collect lifetime history of brain injury data across State settings
- Compare data to other participating subscribers
- Contribute to the larger picture of national data
- Leverage data for funding in your state
- Initiate information and referral about programs and supports in your state

What tools are available? The OSU TBI-ID Identification Method and the Symptoms Questionnaire for Brain Injury, as well as several additional demographics modules.

Is the OBISSS a public platform? Public only in the sense that the subscriber can share the link to the OBISSS tools across settings and systems. NASHIA uses a secure, HIPAA-compliant data platform.

Can I customize the OBISSS for my agency? Absolutely! There are a number of built-in demographics you can access (or not) and others we can create for you.

**Support States.
Grow Leaders.
Connect Partners.**

**NATIONAL ASSOCIATION
OF STATE HEAD INJURY
ADMINISTRATORS**

Costs:**

12-Month Subscription : \$6,500

**Add-ons can be included, such as additional number of screens, reports, specialized training, a help desk, and data-collecting questions.

Can my subscription be included as an add-on with my NASHIA membership? Yes! We want to make this as easy as possible for you.

Can I purchase a multi-year subscription?

Absolutely! You can purchase consecutive subscriptions. Additionally, OBISSS add-ons can be purchased at anytime throughout the subscription period.

What is included in my 12 month subscription?

Good question!

The package includes the following:

- Access to the OBISSS for 12 months to include the online versions of the Self-Administered OSU TBI-ID, the Symptoms Questionnaire for Brain Injury, and demographics collection
- Up to 5,000 completed screens
- Inclusion of subscriber-specific resources
- Quarterly raw data reports throughout the subscription period
- One descriptive report
- Marketing flier for providers
- Promotional videos to include one accessible video
- One Implementation Meeting
