Brain Injury, Violence and At-Risk Populations
About the NASHIA Conference
Join NASHIA in celebrating 24 years while creating a vision for our future. We invite you to the National Association of State Head Injury Administrators 24th Annual State of the States in Head Injury Meeting From Model T's to Modern Times: Emerging Trends in Brain Injury being held October 7-10, 2013, in Detroit, Michigan. The State of the States (SOS) Meeting is the only annual national meeting providing professional development opportunities among state government program administrators specifically in the field of traumatic brain injury. The Meeting will feature keynote speakers presenting on issues impacting brain injury and state services, national trends, and federal policy. The pre-conference, Brain Injury, Violence and At-Risk Populations will focus on shedding light on the connections of pediatric, adult and older adult violence and brain injury and learning how states can foster connections within these areas of focus. During the day you will gain new perspectives on improving systems to serve individuals with TBI, and in the evening you may explore the wealth of attractions Detroit has to offer. Detroit is well known as: Motown, home to music legends Berry Gordy, Diana Ross and Smokey Robinson; Hockey Town for Stanley Cup winners, and Ford Motor Capital, where Henry and Edsel Ford worked and lived.

Who Should Attend? While the primary focus of the SOS meeting is on State government services and programs, the meeting is open to all who are involved in the field of brain injury including advocates, individuals with brain injury, families, professionals, and anyone else concerned with planning, prevention, and service delivery for individuals with brain injury. Please join us for a superior educational program and a great opportunity to network with your friends and colleagues in the field of brain injury!

**Goal:** NASHIA's SOS Meeting is designed to foster communication and professional development among State government brain injury program administrators. Government employees, consumers, Brain Injury Association of America chartered State affiliates, and other professionals responsible for administering brain injury prevention, rehabilitation, community integration programs and services assemble for this conference. The SOS program offers plenary and workshop sessions on a variety of topics covering emerging federal and State issues and promising practices on service delivery, as well as opportunities for information sharing among participants.

**Objectives:** 1) to offer professional development opportunities among state government program administrators specifically in the field of traumatic brain injury as well as those involved in the field of brain injury including advocates, individuals with brain injury, families, professionals and anyone else concerned with planning, prevention and service delivery for individuals with brain injury; 2) to feature key keynote speakers who present on issues that impact brain injury and state services, national trends and federal policies; and 3) to gain knowledge on new approaches to improving systems for individuals with TBI.
